About EdgeScience

EdgeScience is a quarterly magazine available to the general public either as a free downloadable PDF file or as a printed full color magazine for an additional charge. It is also provided as a benefit to each of the 800 SSE members in 45 countries. The SSE membership is comprised of a broad range of international scientists and professionals who conduct research or have a serious interest in unexplained anomalies. The scope of scientific phenomena cover the entire spectrum to include psi, cold fusion, consciousness, remote viewing, UFOs, and more cutting edge topics.

Reach

The availability of the first issue of EdgeScience more than doubled the amount of monthly traffic to the SSE website and caused a one day spike that rivaled the traffic to the website when the society was mentioned by Time magazine. In the first month alone EdgeScience was downloaded more than 2,000 times.

Get in on this ground-floor opportunity by promoting your product in this promising new magazine.
